1. Introduction and background. Bonding is crucial to an individual's lifetime developmental process. Attachment theory describes bonding as a continuous process in which a child creates a relationship with the mother .The first hour of life after birth is the ideal time for maternal-newborn bonding to proceed , .This process enables parents and infants to involuntarily establish a nurturing ...

Supporting mothers to bond with their newborn babies ...

However, even in the United States, a high resource country, rates of maternal mortality continue to be a concern, particularly in African American women. Most maternal mortality could be prevented with timely health care, so delays in receiving treatment are an important target for public health interventions to reduce maternal mortality.
