monly used in plastic-esthetic periodontal and implant surgery. The needle is inserted 2 to 4 mm from the flap margin and passed through both flap segments. At a horizontal distance of 3 to 5 mm from the first insertion site, the needle is passed back in the opposite direction, forming a parallel suture. After the last stitch, the suture

### PLASTIC-ESTHETIC PERIODONTAL AND IMPLANT SURGERY

Periodontal plastic surgery comprises an increasing part of clinical periodontology. Clinical trials have traditionally used professionals to judge esthetic outcome, and few studies have addressed patient needs and requests (true end points). Development of universally accepted and validated methods for professional esthetic assessment, together with standardized questionnaires for patient-perceived outcome, may help to provide better insights into the true needs and benefits of periodontal ...
