Rape is one of the oldest crimes, yet in some ways it is the least understood. Criminal law classifies rape as a crime against the person along with murder, robbery, and battery. But in at least one respect rape is unique--with few exceptions its perpetrators are male and its victims are female. The gendered nature of rape raises questions of equality and fairness as well as about the scope of individual rights to autonomy, privacy, security, and bodily integrity. Rape is therefore an important subject for political and social philosophy as well as for ethics, feminist philosophy, and the philosophy of law. This collection of original essays by leading philosophers investigates the philosophical dimensions of rape in all of its manifestations: act, crime, practice, and institution. The essays examine such issues as the nature of rape; the wrongfulness and harmfulness of rape; the relation of rape to racism, sexism, classism, and other forms of oppression; and the legitimacy of various rape-law doctrines (such as the corroboration requirement, the marital-rape exemption, and the reasonable-belief defense). Each contributor advances a novel argument and seeks to disentangle the conceptual, evaluative, and empirical issues that arise in connection with the crime. Editor Keith Burgess-Jackson provides a substantive introduction, a history of rape law, two extensive bibliographies, and a detailed index to round out this major addition to a much-needed philosophical discussion of rape. *A Most Detestable Crime* is among the first philosophical anthologies devoted exclusively to the subject of rape--as complex and interesting intellectually as it is pervasive and disturbing socially. It is an essential reference work not only for legal and feminist philosophers, but for feminist scholars and practitioners in every field, including law, medicine, social work, and counseling. This volume will also be of interest to social, political, and legal theorists of every ideological and methodological persuasion.

One morning in March 1888, twelve-year-old Milton Daub awoke to find the world buried in snow. The blizzard was like nothing Milton and his neighbors in the Bronx had ever seen. No one dared go out into the storm. No one, that is, except Milton. He and his father made a pair of snowshoes from barrel hoops and old roller skates. Then Milton stepped bravely into the storm to buy milk for his family. Soon he was buying supplies for everyone in the area. His neighbors declared him a hero. The Blizzard of 1888 set records in the Northeast that are still unbroken. It forced whole cities to shut down for days. But Milton didn't let the snow stop him from helping neighbors in need. His true story is both an exciting adventure and a heartwarming glimpse of old New York.

According to author Mike Schmoker, there is a yawning gap between the most well-

known essential practices and the reality of most classrooms. This gap persists despite the hard, often heroic work done by many teachers and administrators. Schmoker believes that teachers and administrators may know what the best practices are, but they aren't using them or reinforcing them consistently. He asserts that our schools are protected by a buffer--a protective barrier that prevents scrutiny of instruction by outsiders. The buffer exists within the school as well. Teachers often know only what is going on in their classrooms--and they may be completely in the dark about what other teachers in the school are doing. Even principals, says Schmoker, don't have a clear view of the daily practices of teaching and learning in their schools. Schmoker suggests that we need to get beyond this buffer to confront the truth about what is happening in classrooms, and to allow teachers to learn from each other and to be supervised properly. He outlines a plan that focuses on the importance of consistent curriculum, authentic literacy education, and professional learning communities for teachers. What will students get out of this new approach? Learning for life. Schmoker argues passionately that students become learners for life when they have more opportunities to engage in strategic reading, writing with explicit guidance, and argument and discussion. Through strong teamwork, true leadership, and authentic learning, schools and their students can reach new heights. Results Now is a rally cry for educators to focus on what counts. If they do, Schmoker promises, the entire school community can count on unprecedented achievements.

The best-laid plans of ponies often go awry--and as the heist begins to fall apart, Luna's knights are put to the ultimate test. With teammates turning and new revelations coming to light, will the Nightmare Knights ever be able to defeat Eris and return Luna's powers?

"It's hard to align with money if you think that it is evil and nasty. But once you come to an understanding that money is neutral, it's easy to see that having money does not necessarily deprive somebody else. There's no reason why you can't be very rich and still be an extremely spiritual and wonderfully generous person--aligned to the God Force--with a huge heart, and compassion for everyone you meet." — Stuart Wilde
