Anyone can get into a fitness rut. You could be exercising regularly but feeling unmotivated about your current routine. Or you could be enjoying your workouts but not getting the results you really want. You can even be on health club hiatus and looking for a way to get back into exercise-mode. Whatever your situation, cross-training is a practical solution. Cross-training is a well-rounded way of approaching exercise. It allows you to vary your workouts so you can inject a little excitement into your fitness routine, while you receive better results out of your exercise plan. If you have a real thirst for fitness knowledge then Cross-Training For Dummies is for you. Whether you just want to use cross-training as a way to spice up a dull workout routine or you ' re looking to develop specific skills that will enhance your performance in a specific activity or sport, this book can get you on track. Cross-Training For Dummies will keep you motivated, intere sted, strong, and injury-free as you strive to improve your level of fitness. From savvy tips that ' ll turbo charge your workouts to great advice on weight lifting, fitness activities, and team sports, this book has just what you need to advance to a higher level of fitness. Cross-Training For Dummies also covers topics hat will help you to: Assess your fitness level Set personalized exercise goals Have fun with individual and team sports Incorporate kickboxing, Pilates, spinning, and other cutting-edge workouts into you routine Understand the five elements of fitness Challenging your body to new fitness levels is hard work, but the results are well worth it. Cross-Training For Dummies will help you understand how cross-training works and show you how to put together a well-balanced training program that will keep you happy and healthy.

A full-color introduction to the basics of HTML and CSS from the publishers of Wrox! Every day, more and more people want to learn some HTML and CSS. Joining the professional web designers and programmers are new audiences who need to know a little bit of code at work (update a content management system or e-commerce store) and those who want to make their personal blogs more attractive. Many books teaching HTML and CSS are dry and only written for those who want to become programmers, which is why this book takes an entirely new approach. Introduces HTML and CSS in a way that makes them accessible to everyone—hobbyists, students, and professionals—and it ' s full-color throughout Utilizes information graphics and lifestyle photography to explain the topics in a simple way that is engaging Boasts a unique structure that allows you to progress through the chapters from beginning to end or just dip into topics of particular interest at your leisure This educational book is one that you will enjoy picking up, reading, then referring back to. It will make you wish other technical topics were presented in such a simple, attractive and engaging way! This book is also available as part of a set in hardcover - [Web Design with HTML, CSS, JavaScript and jQuery, 9781119038634](#); and in softcover - [Web Design with HTML, CSS, JavaScript and jQuery, 9781118907443](#).

From regular maintenance for optimum performance to emergency repairs, this illustrated e-guide is the perfect handbook for beginners and experienced cyclists alike. The Bike Repair Manual includes insightful information on the anatomy and functioning of all types of bikes - road, racing, mountain, hybrid, BMX and children's. Step-by-step sequences show you how to carry out repairs, from vital servicing to improving your bike's performance both on and off road. Learn how to maintain the main elements, such as brakes, drivetrain, and steering, as well as the complex components, including hub gears, hydraulic brakes, and suspension forks. Detailed chapters cover everything from the correct, safe way to set up your bike and the must-have kit for successful repairs to troubleshooters for keeping your bike in top form. Featuring easy-to-follow photographic tutorials and handy add-ons, such as a step locator and toolbox, Bike Repair Manual is the essential e-guide for every cyclist.

Biopolitics and the ' Obesity Epidemic ' is the first edited collection of critical perspectives on the 'obesity epidemic.' The volume provides a comprehensive discussion of current issues in the critical analysis of health, obesity and society, and the impact of obesity discourses on different individuals, social groups and institutions. Contributors from the UK, Canada, New Zealand and Australia provide original, accessible, and engaging chapters on issues such as the effects on individuals, families, youths and schools. The timely contributions offered by Biopolitics and the ' Obesity Epidemic ' to this highly topical area will be of interest to a wide range of readers, including teachers, education professionals, community health and allied professionals, and academics in areas such as education, health, youth studies, social work and psychology.

Bulging in-boxes, out-of-control stress, and even climate change serve as reminders that when it comes to being happy and healthy, less is more. In this interactive journal, organization expert Mary Carlomagno leads readers on a journey toward release and discovery. Guided by the principle that the way you spend your time and money should reflect your true priorities, Secrets of Simplicity shows how to make practical changes to unburden your closets and calendars and make room for what's really important. Readers can record their successes, as they de-clutter their homes and in the process, their minds.

The answer for Why Do People Act That Way? can be found in the interactions of our perceptions, emotions, motivations and behaviors. Discover the four essential complexes and the five basic emotional systems as the keys to the understanding and influencing the people around you. In life, there are no bad emotions, nor good emotions. They are just that -- human emotions. The real question lies in what we do with them. What this book will do for you: -- Teach you practical skills you can use daily to disentangle complicated or difficult situations and relationships. -- Give you insight into the four key complexes of the mind and how they shape our sense of reality. -- Offer tools for accurate understanding and effective resolution of the five emotional systems. -- Help you to ask questions, get answers, and then ask better questions. -- Identify your own storyline in a way that may help you resolve some lifelong issues.

"I thought life was pretty much over." Paul Herman "I was afraid people wouldn't see me for who I still was." Cathy Green "I didn't need this to be a better person." Susan Douglas "I wasn't sure I wanted to live 'this way.'" Kevin Wolitzky The above four people and 49 more just like them went on to find high levels of success and lead satisfying lives. Together they tell 53 stories of

moving forward to meet all the challenges, fears, obstacles, and problems common to the life-altering circumstances after spinal cord injury, and doing it without benefit of wealth, large settlements or solid health coverage. Ranging in age from 21 to 67, disabled from three to 48 years they share 931 years of disability experience. Roll Models is a valuable new resource for recently injured people and their families, and for nurses, therapists, psychologists and all other professionals who treat, work with and care for people with spinal cord injury. Straight from the horse's mouth, survivors explore their experiences with disability and answer many questions those in rehab are asking: Early Thoughts What were your thoughts immediately following injury? What were your initial thoughts and reactions regarding SCI and the future? The First Years What were your biggest fears during that first year or so? How did you get past those early fears? Changes, Obstacles and Solutions How much different are you now, compared to how you were before injury? What's been the biggest obstacle? How did you address these obstacles? Finding What Works What have been the most difficult things for you to deal with since injury? What's the worst thing about having an SCI and using a chair? What's been your biggest loss due to injury? Is SCI the worst thing that ever happened to you? Tell me something about your problem solving skills. How do you deal with stress? What do you do to relieve stress? Salvations, Turning Points and More Was there any one thing that was your "salvation" or key to your success? Was there a turning point for you when you began to feel things were going to get better? What personal factors, habits and beliefs have helped you the most? SCI and Meaning Do you find any meaning, purpose or lessons in your disability? Did any positive opportunities come your way because of your injury? What's your greatest accomplishment? What are you most proud of? "A wonderful roadmap with many alternate routes to living and thriving with SCI." Minna Hong, SCI survivor and Peer Support Coordinator/Vocational Liaison, Shepherd Center "Avoids the trap of providing a 'one size fits all mentality' and provides solutions as varied as the individuals used as examples. Accentuates the positives while not sugar coating the difficulties. Essential reading." Jeff Cressy SCI survivor and Director of Consumer and Community Affairs, SCI Project, Rancho Los Amigos "A great resource for people as they venture out into the world, or search for meaning and a deeper, richer life. Filled with examples of real people and their real experiences." Terry Chase, ND, RN; SCI survivor; Patient & Family Education Program Coordinator, Craig Hospital "A wonderful tool for the newly spinal cord injured individual, as well as the therapists and counselors working with them. This certainly hits the mark in capturing important survival strategies." Jack Dahlberg, SCI survivor, Past President of the National Spinal Cord Injury Association "Artfully crafted and organized, Roll Models sensitively portrays life following spinal cord injury. Informative, creative, sensitive, as well as infused with humor and a kind heart. Recommended with my highest accolades." Lester Butt, Ph.D., ABPP, Director of the Department of Psychology, Craig Hospital
