Classification of parts of speech in Chinese is tough due to the lack of morphological differences, and thus is short of in-depth investigation and exploration. Based on the analysis and research of nearly 40,000 Chinese characters, this book elaborates on the system of Chinese parts of speech and proposes a set of criteria on their classification, contributing to relevant theoretical and methodological studies. To begin with, it examines the common characteristics and internal hierarchies of parts of speech, as well as the relationship between grammatical functions and parts of speech in modern Chinese. Then it puts forward the criteria on the classification of Chinese parts of speech, with a descriptive explanation of around 20 parts of speech. Besides, it illustrates the statistical studies on Chinese parts of speech, offering data support and corpus verification to the criteria. Also, it analyses the system of Chinese parts of speech from the perspective of typology. Specifically, it elucidates the

correspondence between syntactic positions and parts of speech, functional differentiation of Chinese word items, etc. This book will be a valuable reference to researchers and students in Chinese linguistics. Learners of Chinese will also be attracted by it.

The UN Global Compact complements other corporate citizenship initiatives by promoting dialogue on the relationship between business and society. At the same time it is the only truly global corporate citizenship initiative. It is not an auditable standard; indeed, it is not a standard or a code in the way that these are normally viewed. It is a set of principles through which business and the United Nations can work in partnership for global social development. For some businesses it is a simplified codification of their existing policies and management practices, but for many engagement represents a challenge and an opportunity to raise their game by aligning profitability with the common good. As the only genuinely global corporate citizenship initiative, the Global Compact draws its moral authority from the UN Secretary-General and its moral and political legitimacy from the UN as the only global political body. It can be viewed as a series of nested networks involving the Secretary-General's Office, the ILO, UNEP, UNHCHR, UNDP and UNIDO, business, NGOs and labour. It can variously be described as an international learning network, as a social network of people and organizations engaged in a global conversation, as a global public policy network, and as a multi-stakeholder dialogue. It is all of these things, but more than anything its greatest success has been in providing a convening platform for a growing global conversation about social development among a variety of actors. However the Global Compact is viewed, it is time to reflect on the first tentative steps of an initiative born in the aftermath of the Cold War, in the "triumph of global economic liberalism" and mass demonstrations against "globalisation". In its first few years, the world has experienced 9/11 and the Iraq War, not forgetting the forty or so civil wars that are ongoing at this time. Whatever is written about the UN Global Compact or its

success will be tentative. But there can be some serious reflection on its aims and origins; some telling of stories of engagement; and discussion on how this initiative has quickly become an important reference point in the dialogue on global and corporate governance.

In this sequel to his first volume of autobiography *Pride and Perjury*, Aitken starts his story as he is taken down from the courtroom and incarcerated at Her Majesty's Pleasure. How this Old Etonian former Cabinet Minister on Mrs Thatcher's inner circle managed to establish new relationships and lasting friendships with fellow prisoners is fascinating - so too is this account of how religious belief transformed his life. Aitken has lost none of his charm, fluency and determination - and he has found an authentic new life which readers of this entertaining new book will be able to judge for themselves. 'A rich collection of humorous tales of prison life... Aitken seems to have found a new vocation of both a funny writer and a serious prison reformer.' *Tablet*

In his thirty years with the National Park Service, Jim Burnett has seen it all: boat ramp mishaps that have sent cars into the water; skunks in the outhouse and bears at the dumpster; visitors looking for the bridge over the Grand Canyon.

Compiled by German linguists with over twenty years of experience in international business, this dictionary reflects all the current usages of German business terminology, identified by specific categories. Business language is in a state of flux all over the world. This is due to the fast-changing global business scene, not only in Europe but also in Asia and the rest of the world. The near-total dependence of business today on digital data and the Internet is another major factor in the transformation of business terminology. The main virtue of this dictionary is the fact that it provides current, twenty-first century business terms and definitions, including hundreds of computer-related terms.
